Dear Hiring Manager,

I am excited to apply for the Data Scientist position. With advanced expertise in Python, Power BI, SQL, and modern AI/ML techniques—including large language models (LLMs)—I bring both technical depth and real-world impact across corporate, nonprofit, and health sectors.

Currently, I lead analytics at IntelliDyne, developing predictive tools and dynamic dashboards using Python, Power BI, and ArcGIS. I specialize in segmentation modeling, lifecycle analytics, and A/B testing—delivering business insights through clean data pipelines and real-time dashboards. My work includes LLM-powered automation, helping teams make faster, more informed decisions.

I previously directed large-scale analytics at World Vision and Medical Teams International, where I built a global Program Information System used in 58 countries with 179 different programs. As a former physician and surgical center owner, I also bring deep experience in healthcare and claims data analysis. Additionally, I co-founded Inspire Ethiopia, using data science to support education initiatives in underserved communities.

I am confident that my technical leadership, AI/ML experience, and cross-sector perspective make me a strong fit for this role. I'd welcome the opportunity to contribute to your team.

Sincerely,

Todd

Dr. Todd A. Nitkin, DPM, FACFAS, MPH
